LOOPS is a stereo signal, we have our own DI boxes for this device.
 BASS AMP has DI output.
 KEYBOARDER has his own DI boxes.
 THIBAUT has his own SHURE PZM 200 system for IN EAR monitor.
 LOÏC uses IN EAR monitor and just needs an XLR IN monitor to plug in his own mixing board.

This is the ideal configuration. In smaller clubs, we can reduce to fit the place. Just let us know what's possible to do.
